

May 2007

Techmer PM at Brasilplast 2007, May 7-11 in São Paulo. Visit us at the booth of Mash Plásticos (B58)

Techmer PM, a global company headquartered in the USA with a focus on design and production of masterbatch solutions, and Mash Compostos Plásticos, a Brazilian national company specialized in the production of compounds and masterbatches, have reached a partnership agreement. This agreement is the first step toward local production in Brazil of Techmer PM color and additive masterbatches for moldings, films, nonwovens, and polymeric fibers.

Mash is a young company that has introduced high quality products and services to the Brazilian national market. The new partnership will allow the South American plastics industry local access to Techmer PM patents, solutions, and technology, through Mash. The two companies have made the commitment to produce Techmer products at the Mash factory. Work is now underway to quickly develop the standards and testing capabilities necessary to ensure the quality and consistency of products, whether produced in Brasil or the USA. "We visited the Mash factory in São Paulo and were impressed with their people, laboratory facilities, and production capabilities," says John Manuck, President of Techmer PM.

Mash and Techmer will have their first joint technical presentation at BrasilPlast 2007. They will use that opportunity to introduce technical innovations and new solutions for a variety of plastic and fiber applications.

Customers that have global masterbatch needs will have technical support and products with the quality they have come to depend on, and with local service. Techmer PM operates five plants in the USA and has manufacturing partners in Europe, Japan, and China. Both Mash and Techmer are ISO9001:2000 certified, and both are committed to the continuous development of new products.

Mash Compostos Plásticos is a Brazilian company located in São Paulo, SP in a modern factory complex. Mash produces technical and color compounds and masterbatches in different resins, such as PP, PA, ABS, PE, etc. For more information about products, visit Mash's website: www.mashplasticos.com.br

Techmer PM is a major producer of value-added color and additive masterbatches for the plastics and fiber industries. Techmer PM specializes in high-performance applications where quality, technical support, and problem solving are critical.
