The Shangri-La Hotel
Dubai, United Arab Emirates

Registration Fee

The full conference package of \$1,400 includes the welcome reception, lunch, dinner, and conference proceedings.

Jointly Organized by:

Applied Market Information Ltd

Leaders in plastics market research and consultancy

ABOUT THE CONFERENCE

The first annual **fibertech® Dubai** conference will feature the latest technologies in resins, additives, colorants, color measurement and extrusion for the synthetic fiber industry. Participants will include representatives from the areas of polypropylene, polyester, and polyamide fiber producers, including BCF, staple, spunbond, meltblown, raffia, and turf yarns. The theme this year is **Creating Value in Fibers**.

The conference involves leading authorities reporting new commercial developments that maximize fiber value. The major resin, pigment, additive, and hardware suppliers from around the world are scheduled to participate in this conference.

KEY TOPICS TO BE ADDRESSED

- Base resin stabilization
- Rapid color matching and sample development
- Improving production operating efficiencies
- New pigment systems for high performance
- New anti-UV technology for PET applications
- New catalyst systems for improved resin performance
- Non-wovens additives
 - Odor absorbers
 - Non halogen FR
 - Hydrophilic/hydrophobic
- Global market trends
