### **Techmer PM Adds Capacity at Tennessee Site**

Techmer PM, a major producer of value-added colors and additives for the plastics and fiber industries, announced the addition of new manufacturing capacity at its plant in Clinton, Tennessee.

The new line was installed in a new extension to the site, bringing the total footprint of the plant to over 200,000 square feet. The 50mm twin screw mega compounder includes numerous up- and down-stream innovations along with an ergonomic material handling system proven to increase efficiencies and reduce the risk of injury to machine operators. This line will compound over 5 million pounds annually, with capabilities in a wide range of polymer systems. It has been engineered to accurately handle complex formulations with multiple components. The project represented a \$3 million investment with a focus toward higher value-added products. VP of Technology Abe Mor noted, "Our formulations are becoming more complex with a need for very accurate additions of key ingredients. We have to match our laboratory investments with highly capable manufacturing additions."

#### *About Techmer PM*

Techmer PM, LLC is a major producer of value-added colors and additives for the plastics and fiber industries. The company had its origins in Los Angeles over 30 years ago and now operates six compounding plants located strategically throughout North America. Techmer has worldwide manufacturing capabilities focusing on high-performance applications where quality, technical support, and problem solving are critical.
