BUILDING & CONSTRUCTION

ENABLING MARKETS

Techmer PM's premier team of engineers has developed ways to stabilize difficult blends, such as wood pulp/polyolefin composite for plastic lumber, to anticipate this demand and upcoming trends.

Techmer PM's custom masterbatches and engineered compounds ensure your construction projects are of the highest quality and resistant to environmental and physical factors. They maintain their color while preventing cracks, crazes, or other wear and tear. We make our designs in close cooperation with our customers to fulfill their unique vision—strategic partnerships that deliver effective results with speed and accuracy.

APPLICATIONS

- Benches
- Decks
- Fencing
- House wrap
- Railings
- Road Marking
- Roofing tiles
- Shingles underlayment
- Siding
- Stadium seating

PERFORMANCE REQUIREMENTS

Techmer PM can help customers meet or exceed performance requirements for building and construction applications.

Various UL and ASTM testing requirements for:

- Fire resistance
- Impact resistance
- Wind resistance
- Solar Reflectance Index (SRI)
- Sidings
- Decking

WHY CHOOSE TECHMER PM?

- **Innovative Solutions:** Our team of experts brings cutting-edge ideas to the table, ensuring your projects stand out in the market.
- **Sustainable Practices:** We are committed to sustainability, helping you achieve your environmental goals through eco-friendly solutions.
- **Comprehensive Support:** From initial consultation to project completion, we provide comprehensive support to ensure your success.

IF YOU DREAM IT, WE ENABLE IT.
